

Project Title

LearnDesk : A Secure and Dynamic Online learning Platform

Website Overview

Learndeck is a web-based learning platform designed to provide structured educational content through a responsive and user-friendly interface. The website is publicly accessible and deployed on cloud hosting platforms.

Publication / Deployment Details

The website has been successfully published on the internet using modern cloud hosting services.

Frontend Hosting Platform: Netlify

Frontend Live URL: <https://learndeskindia.netlify.app/>

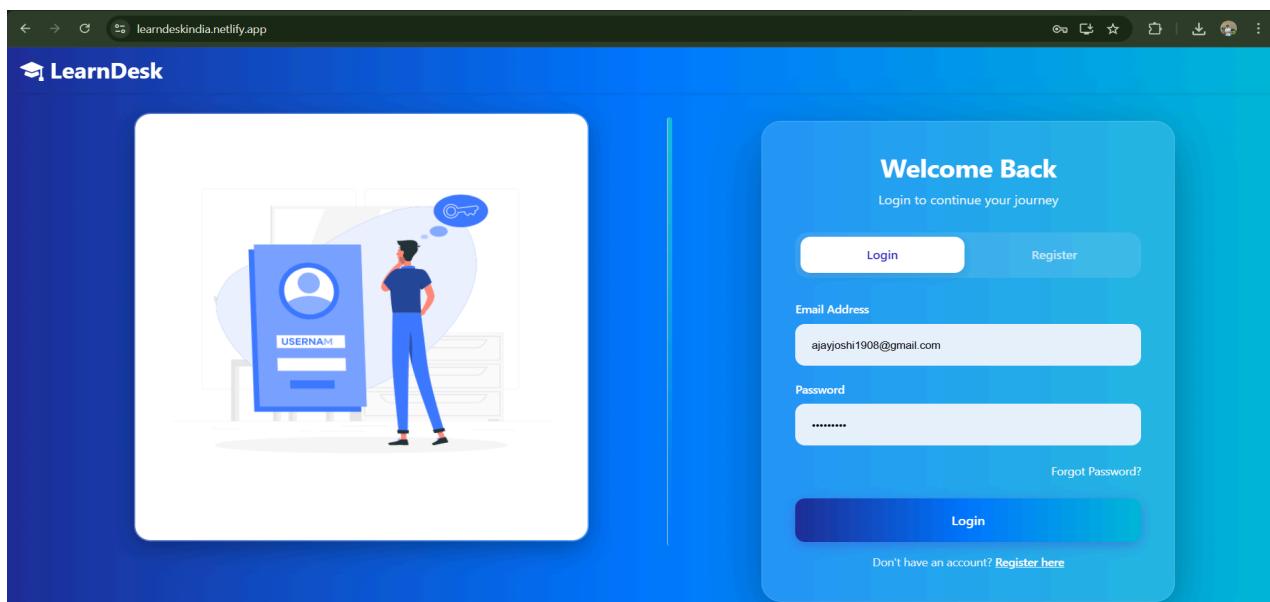

Backend Hosting Platform: Vercel

Backend Live URL: <https://learn-desk-p7clx2bnt-ajay-joshis-projects.vercel.app/>

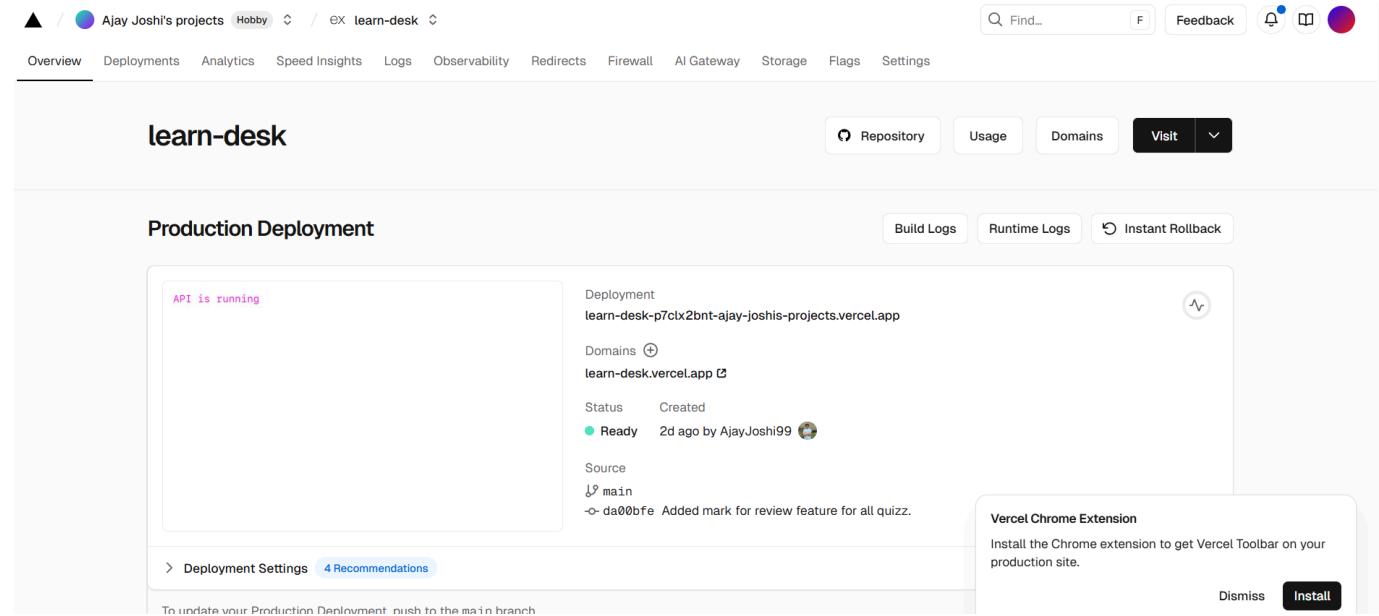

Deployment Proof

The following proofs are included to validate website publication:

Screenshot of live website running in browser :

Screenshot of Vercel deployment dashboard :

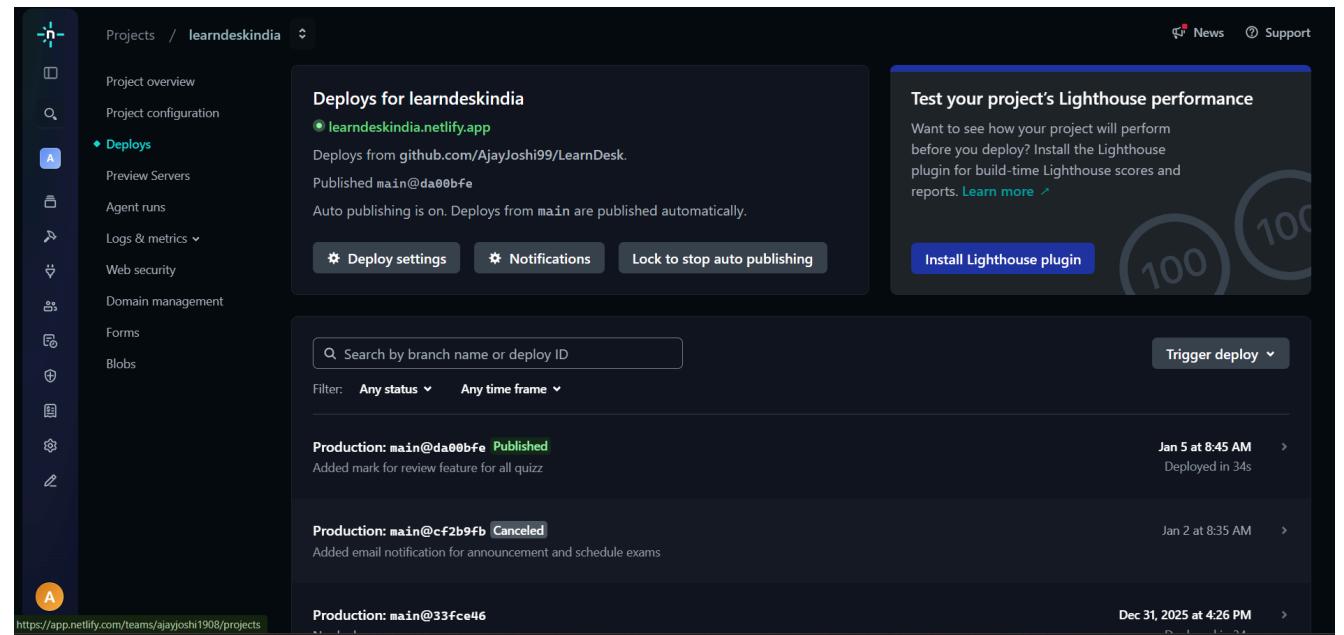

The screenshot shows the Vercel dashboard for the 'learn-desk' project. At the top, there's a navigation bar with 'Ajay Joshi's projects' (Hobby), search, and various settings. Below it, a main header for 'learn-desk' includes links for Repository, Usage, Domains, and Visit.

The central area is titled 'Production Deployment' and shows a card for the deployment 'learn-desk-p7clx2bnt-ajay-joshis-projects.vercel.app'. It displays the status as 'Ready' (2d ago by AjayJoshi99), the source branch as 'main', and a note about adding a review feature for all quizzes. There are buttons for Deployment Settings and Recommendations.

To the right, a sidebar offers the 'Vercel Chrome Extension' with an 'Install' button. At the bottom, a note says 'To update your Production Deployment, push to the main branch'.

Screenshot of Netlify deployment dashboard :

The screenshot shows the Netlify dashboard for the 'learndeskindia' project. On the left, a sidebar lists various project management and deployment options like Project overview, Deployments, Preview Servers, and Web security.

The main area features a 'Deploys for learndeskindia' section with a card for the deployment 'learndeskindia.netlify.app'. It shows the deployment is from 'github.com/AjayJoshi99/LearnDesk' and was published from 'main@da00bfe'. It also indicates auto publishing is on. Buttons for Deploy settings, Notifications, and Lock to stop auto publishing are present.

On the right, a 'Test your project's Lighthouse performance' section encourages users to install the Lighthouse plugin. Below it, a 'Trigger deploy' button is available.

The main dashboard lists three recent deployments:

- Production: main@da00bfe Published** (Published) - Jan 5 at 8:45 AM, Deployed in 34s
- Production: main@cf2b9fb Canceled** (Canceled) - Jan 2 at 8:35 AM
- Production: main@33fce46** (Pending) - Dec 31, 2025 at 4:26 PM

The bottom of the page shows the URL <https://app.netlify.comteams/ajayjoshi1908/projects>.

Conclusion

This document confirms that the Learndeck website has been successfully published and is accessible online. The project fulfills the website publication requirement for the final year project submission.
